

The children of a non-formal school in South India have helped to design and print this calendar.

The theme of 'Decorative Birds' was part of a larger project on birds which one group of children were involved in over a period of three months.

The designs have been taken from motifs used in metal, cloth, wood, and lacquer work. The pictures include a design traditionally done on the hand with 'mehendi', a plant-dye a detail of a wall painting and an illustration from a medieval manuscript.

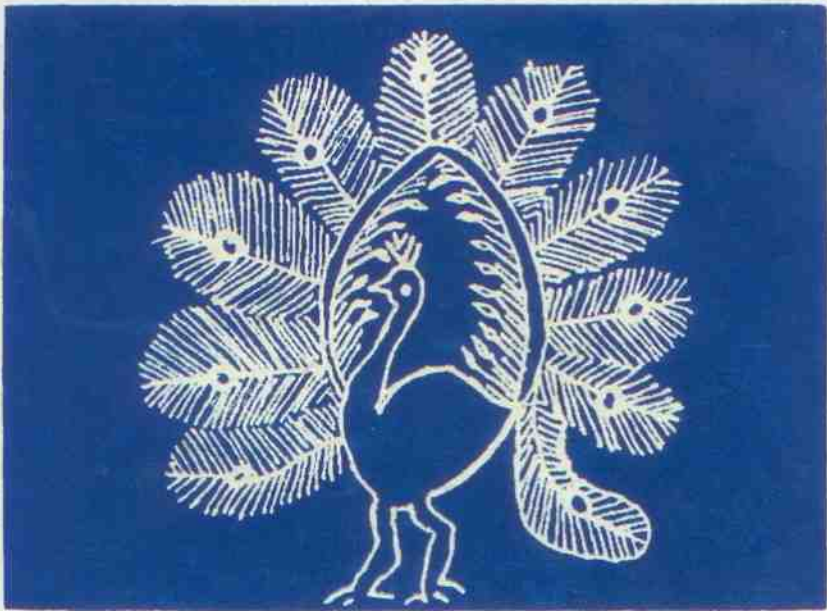

Any profits from this calendar will be used for the further studies of the children whether in vocational training or high school.
